

SNAPSHOT

CHILD CARE AND THE ARKANSAS ECONOMY

Child care is a key support for the Arkansas workforce.

19% of adults in Arkansas have young children. That's approximately **208,000** people.

Child care is necessary for single parents to work.

31% of Arkansas mothers with young children and **17%** of Arkansas fathers with young children are single parents.

Young parenthood boosts men's workforce participation but lessens women's workforce participation.

68% of Arkansas women with young children and **75%** of Arkansas women with no minor children participate in the labor force.

Corresponding figures are **94%** and **82%**, respectively, for Arkansas men.

High child care costs challenge families with young children.

\$7,200
per child per
year on average

=

11% of median
income for Arkansas
households with a
young child

Despite high care costs, child care workers earn less than the typical Arkansas worker.

The **median hourly wage** of an Arkansas child care worker is **\$13.85**, and the **median for all workers** is **\$18.78**.

NOTES: Statistics are based on prime-age civilian adults ages 25 to 54. Adults are considered parents when a biological child, stepchild or adopted child under 18 is living with them. Young children are defined as ages 0 to 5. Single is defined as separated, divorced, widowed or never married. Average cost is rounded to the nearest hundred. Wage statistics include all full-time workers in a category, regardless of age. The U.S. Department of Health and Human Services' definition of affordable child care is no more than 7% of household income. Statistics on child care costs and worker wages are based on center-based care and omit subsidies. See Moosavian (2021) for the effect of parenthood on labor force participation.
