

Labor Market Experiences among Not Working, Not-in-School Young Adults in Mississippi

Who are they?

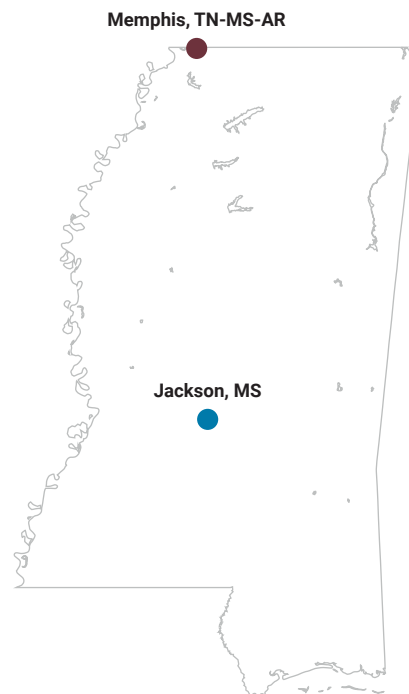

Young adults ages 18 to 24 who are neither working nor in school.

Why is this a problem?

Economic disconnection can have negative effects for both the individual and the broader economy. For example, it makes it harder for young adults to reenter the labor force and more difficult for employers to fill open job positions.

How does it happen?

Barriers like a lack of access to affordable child care or transportation and difficulty getting or holding a job due to mental health challenges, disability or experience with the criminal justice system can impede young adults' participation in school or the labor force.

Opportunities for Community Response

- Improve the child care ecosystem for families and providers
- Increase investment in and exposure to career pathways through experiential and project-based learning, internships, and career and technical education**
- Review accommodations for physical disabilities and mental health needs
- Assess whether there are local, entry-level job opportunities that do not require work experience or a college degree
- Promote a supportive environment for choosing employment directly out of high school**
- Create carpooling opportunities or offer shuttles to places of employment

Coahoma Community College in Clarksdale hosts a workforce development center that provides short-term training for individuals seeking to enter the workforce or upgrade their skills, such as through coding classes, industrial lift operations, employment training, interview etiquette training, EKG training, and more.

Meraki Roasting Co. in Clarksdale is a career readiness and entrepreneurial program that targets disconnected youth ages 16 to 24. Youths and young adults receive hands-on training and professional development in nonverbal and verbal communication skills, time management, professional dress, ownership, résumé building, interviewing, and tracking and managing a budget.
